

I love listening to XM Satellite Radio and its traffic and weather channels. XM satellite radio provides variety and better quality that is not available in Denver because Clear Channel dominates the market and forces us to listen to crap. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I oppose HR 4026 and I urge you to reject the NAB's petition 04-160.
